

DIGITAL ADVERTISING SIGNS

Maximum attention at the village entrance

A LED-display at the side of the road, in the city center or at a company site cares for maximum attention of the viewer. With its high resolving LEDCON-full-color modules it is not only possible to display writings and logos but complete graphics and images may be displayed.

In addition to the bare transport of information, the LEDCON-display may be used ideal for advertising marketing. The extensive telecontrol allows decided time schedules for advertising clients and a protocol and accounting to the split second of the sole circuit times

Features

- ⇒ Front- or Rearservice

Up-to-date information

In cooperation with a so called "content-management-system", new contents may be played to the LEDCON-display by drag-and-drop via cable or radio. This may be done in real time or time controlled, the changing contents are configurable to the split second.

With this, the city center event is announced, news from the commune are spread or the announced company delegation is welcomed at the entrance of the company digitally

LED display made by LEDCON

Customer-focused project management, uncompromising quality of products, as well as overall professional service entitle LEDCON systems to one of the leading producers of LED systems.

In recent years a powerful set of enterprises from development to sales has grown on the 3500 m² company site. This cooperation ensures an extraordinary flexibility thus enabling even highly customized solutions.

You plan an Out-Of-Home-Display, a Digital-Signage-Screen or an information banner at your point of sale - we manage any environment and purpose of messages via LED systems precisely shaped to your individual concepts and needs. A globally spread network of providers sets LEDCON into a position to select the best suited components for any imaginable LED display project and precisely shape according to your imaginations.

LEDCON accompanies your project from its first ideas to setting it into operation. No time-consuming coordination of scattered branches for you - one of our skilled and

experienced project managers guides you along throughout the project as your single, personal addressee.

Our support concept comprises assistance in visualisation matters, CAD based design, calculation, matters of statics, sketches of details and of course in the final installation and setting into operation.

If required we additionally support you in matters of administrative permission or composition of relevant project data.
